Title	Page
A different airway management in double lumen tube intubation due to unexpected difficult airway	20
Acupuncture in critically ill patients	35
Bedside management of massive pulmonary embolism: a case report	42
Bronchoscopy guided percutaneous dilatational tracheostomy; performed by anaesthesiology residents	6
Comparing the effects of propofol dosing based on total body weight and lean body weight on hemodynamics and intraoperative awareness during sleeve gastrectomies	58
Comparison between patient-controlled tramadol infusion and additional thoracic paravertebral block in the management of post-thoracotomy pain; a retrospective study	47
Comparison of bupivacaine and levobupivacaine in continuous axillary brachial plexus block	11
Comparison of the use of remifentanyl in infusion and patient-controlled methods for sedation purposes	52
Difficult airway due to acute necrotizing mediastinitis: a case report	45
Effect of pericapsular nerve group block on perioperative analgesia characteristics for hip fracture operations	63
Epidural versus intravenous analgesia for pain control in kidney donors, a retrospective cohort study. Is there a kinship relationship?	1
Malign hyperthermia in beating heart coronary artery bypass surgery	71
Mechanical power and postoperative pulmonary complications in patients undergoing major abdominal surgery	80
Preoperative patients' knowledge level regarding anesthesia procedures and anesthesiologist responsibilities	29
Sciatic nerve pulsed radiofrequency treatment in coccydynia	92
The effect of smoking on arterial blood gases, respiratory mechanics and hemodynamic parameters in patients undergoing laparoscopic cholecystectomy	74
The efficacy of lumbar epidural steroid injections in "failed back surgery syndrome" and lumbar radiculopathy	24
The progression of biochemical parameters and disease severity scores in patients with septic shock: a study of sequential measurements	86
Traditional and complementary medicine applications in preoperative anxiety	16
Unexpected laryngeal lesion in an expected difficult airway	97
